

COUNTY GOVERNMENT OF SIAYA

DEPARTMENT OF FINANCE & ECONOMIC PLANNING DIRECTORATE OF PUBLIC PARTICIPATION & PETITIONS

REPORT ON PUBLIC PARTICIPATION IN THE SIAYA COUNTY ANNUAL DEVELOPMENT PLAN (CADP) 2025-2026

1. Introduction

Public participation in the development of the County Annual Development Plan (CADP) for the 2025-2026 fiscal year was a critical process aimed at ensuring that the voices of Siaya County residents were reflected in the county's development agenda. This report presents an overview of the public participation process undertaken for the CADP, highlighting the methods used, the process undertaken, stakeholder involvement, key issues raised, challenges, emerging issues, key findings, and recommendations for future public participation efforts.

2. Purpose of the CADP

The County Annual Development Plan (CADP) is a strategic document that outlines the priority projects and programs to be implemented in Siaya County over one year. The CADP 2025-2026 serves as a roadmap for the county's development efforts, providing a framework for resource allocation and guiding the implementation of key initiatives aimed at improving the livelihoods of residents.

3. Objectives of Public Participation

The objectives of the public participation process for the CADP 2025-2026 were to:

- a) Ensure inclusivity and transparency in the planning process.
- b) Gather inputs, feedback, and concerns from the public, including marginalized and vulnerable groups.
- c) Align the county's development priorities with the needs and aspirations of its citizens.
- d) Foster accountability in the allocation of resources and implementation of projects.

4. Legal Basis for CADP

The preparation of the CADP is grounded in the Constitution of Kenya, 2010, particularly in Articles 10, 174, and 201, which emphasize the principles of public participation, accountability, and transparency in governance. Additionally, the County Governments Act,

2012, and the Public Finance Management Act, 2012, provide the legal framework for the preparation and implementation of the CADP, ensuring that it aligns with the broader national development goals and the County Integrated Development Plan (CIDP).

5. Roles of County Budget and Economic Forum (CBEF)

The County Budget and Economic Forum (CBEF) was involved in the planning and execution of the citizen participation forums as it plays a critical role in the CADP process by:

- a) **Advising the County Government:** Providing input on financial and economic matters, including budgetary allocations and economic planning.
- b) **Facilitating Public Participation:** Ensuring that the public is adequately informed and engaged in the budgeting and planning processes.
- c) **Reviewing and Approving Proposals:** Evaluating the proposals submitted by various stakeholders and aligning them with the county's development priorities.

6. Methodology

The public participation process involved various methods to reach a wide audience across all wards in Siaya. These methods included:

- a) **Public Forums:** Organized in each ward to engage citizens directly. The forums were advertised through local radio stations, social media, and community notice boards.
- b) **Stakeholder Workshops:** Targeted workshops were held with key stakeholders, including representatives from civil society organizations, community-based organizations, youth groups, women's groups, and religious institutions.
- c) **Online Submissions:** A WhatsApp group conference call with GemYala Township Gen Z allowed some Yala residents living outside Yala Township Ward to submit their proposals, suggestions and feedback.
- d) **Community Forums (CYFs):** CYFs were conducted with specific groups such as women at the Valley of Hope in Siaya and youth at Karemo Resource Centre from all six sub-counties to capture their unique perspectives. These forums were organized by the Siaya Muungano Network, where the participants presented written memoranda for consideration by the county government.
- e) **Written Memoranda:** Collected from various groups and individuals to document their proposals and concerns.

7. Public Participation Process

a) Mobilization of the Public and Publicity:

To ensure wide participation, the county government undertook an extensive publicity campaign to inform the public about the CADP process. This included announcements through the Standard newspaper (10th August 2024) (*Annex 1*), local radio stations (notably Mayienga and Kababa FM), social media platforms, SMS, phone calls to mapped stakeholders, and the

county website (www.siaya.go.ke - <https://siaya.go.ke/invitation-of-public-views-on-preparation-of-county-annual-development-plan-cadp-for-fy-2025-2026>). Ward administrators and local leaders played a crucial role in mobilizing residents to attend public forums.

b) Pre-Meeting for Ward Administrators & CBEF:

Before the commencement of public forums, a pre-meeting was held with ward administrators at the County Procurement Hall in Siaya to brief them on the objectives, expected outcomes, and logistics of the public participation process. This meeting ensured that administrators were well-prepared to facilitate discussions and gather relevant feedback from the public.

Secondly, a special meeting was held between the County Budget & Economic Forum (CBEF), technical officers from all the county departments and agencies together with the County Planning & Budget secretariat between 12th – 16th August 2024 at Marais Hotel, Siaya. The purpose of the meeting was for the departments and agencies to share with the CBEF their draft CADP 2025-2026 for insights and better understanding before the public participation forums.

c) Facilitation of Public Participation and Team Formation:

The county government formed six facilitation teams, each tasked to cover five wards within 5 days, comprising county officials from various departments or directorates, including planning, finance, governance and administration, CBEF, public participation, monitoring & evaluation, and public communication (*Annex 2*). The teams were responsible for coordinating the public forums, documenting feedback, and ensuring that all logistical aspects were handled smoothly. Sign language interpreters were included to ensure inclusivity.

d) Budget and Logistics:

The Department of Finance & Economic Planning procured the services to facilitate the public participation logistics. Ward administrators handled logistics and venue preparations, including venue hire, tents, publicity, public address systems, transportation, refreshments, photocopying, printing, and publicity materials.

e.) Public Participation Forums at the Ward Level

Public participation forums were conducted at the ward level across all sub-counties in Siaya County between the 19th and 23rd of August 2024, offering residents a crucial opportunity to express their views, pose questions, and provide recommendations on the county's development agenda. The teams carefully moderated the forums, ensuring that discussions remained structured and that, all feedback was meticulously documented. Below is an outline of the key activities that took place during these public participation exercises:

- i. General Introduction:** The forums began with a general introduction of county officials and participants. This introductory session helped set the tone for the engagement and made the participants feel acknowledged and involved in the process.
- ii. Ward Project Implementation Status Report:** Ward Administrators presented an overview of the project implementation status for the fiscal year 2023-2024. This

provided participants with a clear understanding of ongoing and completed projects in their respective wards, facilitating informed discussions.

- iii. **Sensitization on CADP Preparation:** Participants were sensitized on the preparation process of the County Annual Development Plan (CADP) for the fiscal year 2025/2026. This session was crucial in helping the public understand the planning stages and how their input would contribute to the final plan.
- iv. **Distribution of Reference Materials:** Various documents or extracts were distributed to participants in all wards to serve as reference materials. These included:
 - The ward projects implementation status report for FY 2023-2024.
 - The ward-based and executive projects listed in the current budget for FY 2024-2025.
 - Ward proposals for the County Integrated Development Plan (CIDP) 2023-2027.
 - CADP priority proposal forms to be filled by sub-location representatives.
- v. **County Budgeting Process Sensitization:** In the wards where the CECM Finance and Planning participated, there was additional sensitization of citizens on the county budgeting process. This provided a deeper insight into how budgets are formulated, managed, and aligned with development goals.
- vi. **Breakaway Sessions:** Participants were divided into groups according to their sub-locations for focused discussions on priority areas. This allowed for more detailed and localized discussions, ensuring that the specific needs of each sub-location were adequately addressed.
- vii. **Group Presentations in Plenary:** After the breakaway sessions, each group or sub-location presented their discussion outcomes in a plenary session. This ensured that all voices were heard and that there was a collective understanding of the priorities across the ward.
- viii. **Q&A Sessions:** A Question and Answer session was held, where different stakeholders in attendance were allowed to ask questions. Community leaders and county officials responded, offering clarity and addressing any concerns raised by the participants.
- ix. **Report Writing Workshop:** The Directorate of Budget & Planning organized a report writing workshop at Marais Hotel, Siaya from 26th – 29th August 2024 bringing together CBEF, Directorates of Public Participation & Petitions, Public Communications, and the Budget & Planning Secretariat.

8. Participation and Attendance

The public participation forums saw a diverse turnout, with a total of approximately **2533 participants** including community members, representatives from civil society organizations, persons with disabilities, community health promoters (CHPs) county government staff, ward development committees, religious leaders, youth groups, women's groups, health facility committees and (*Annex 3*) The attendance varied across wards, with some recording higher numbers due to effective mobilization and publicity efforts.

9. Proposals

9.1 Public Input/Priorities gathered (Submission of Memoranda) during the forums

The summary of priorities as proposed by the citizens per ward in their group discussions at the sub-location level across the sub-counties is attached (*Annex 4*)

9.2 Written Memoranda:

The written memorandums received from the citizens and organizations included Siaya youth, Siaya Women, Siaya CSOs, Yala sub-county (Level 4) hospital, and Yala Queens sports club (*Annex 5*).

9.3 Siaya CBEF Advisory on Annual Development Plan FY 2025-2026

The County Budget and Economic Forum (CBEF) held consultative sessions with all the county government departments and agencies at the Marais Hotel in Siaya. The sessions allowed the departments to share their performance status for FY 2023-2024 and their proposals for the new budget calendar for 2025-2026. Secondly, the CBEF members participated in the public participation sessions in all 30 wards to consolidate citizens' views for incorporation into the Annual Development Plan for the Financial Year 2025-2026. The detailed advisory on the CADP for the FY 2025-2026 can be reviewed in **Annex 6**

10. Challenges

Despite the successes, the process faced several challenges:

- a) **Low Turnout in Some Areas:** In certain wards, the turnout was lower than expected due to factors such as inadequate publicity, short notice for the meetings, and logistical challenges.
- b) **Time Constraints:** The public participation process was conducted within a tight timeline, limiting the depth of discussions in some forums. Participants often had to rush through important topics, which may have resulted in some issues being inadequately addressed.
- c) **Inadequate Publicity:** In some cases, the publicity efforts were insufficient to reach all potential participants, particularly in remote areas. This resulted in lower participation levels and a lack of representation from all segments of the population.
- d) **Logistical Challenges:** There were instances where logistical issues, such as delays in the distribution of necessary documents or the availability of appropriate venues, hindered the smooth conduct of the forums. In some wards, these issues led to confusion and inefficiencies during the participation process.
- e) **Limited Resources:** The budget allocated for the public participation exercise was constrained, affecting the quality of engagement for instance given the limited number of copies of the documents distributed to the participants.
- f) **Inconsistent Attendance of County Officials:** The absence of key technical county officials, in some forums affected the quality of responses to participants' questions and concerns.

- g) **Inconsistent reporting:** Lack of a template for reporting the project implementation status of the previous year 2023-2024 by the ward administrators affected the quality and details of the report coupled with the fact the reports were done last minute without verification of the facts.
- h) **Inadequate Capacity:** There was a noted lack of capacity of the residents in understanding the planning and budgeting processes. This limited the effectiveness of public participation, as some participants were not fully equipped to engage meaningfully in the discussions.
- i) **Ward Administrator Conduct:** It was noted that some ward administrators attended public participation venues while intoxicated, raising concerns about their conduct and effectiveness.
- j) **Scheduling Conflicts:** In North Uyoma, the late arrival of participants was partly due to the clash with market day and another meeting by the health department at the same venue. This indicates the need for better scheduling and coordination to avoid conflicts.
- k) **Lack of Feedback:** Participants noted that the County Executive often does not report back on actions taken in response to issues raised during previous public participation events. This lack of feedback can lead to frustration and a sense of being unheard in the community.
- l) **Departmental Absence:** Several technical departments, particularly Roads, Fisheries, Environment, Tourism & Sports, often do not participate in public engagement sessions. This absence limits the ability to address specific concerns raised by the public during these forums.
- m) **Underrepresentation:** Some sub-locations were not represented in the meetings, meaning their specific needs and concerns may have not been adequately addressed in the planning process.
- n) **Funding Allocation:** The process of approving budgets before technical designs and Bills of Materials (BOMs) are done often results in inadequate funding of ward-based projects. This issue points to a need for better planning and budgeting practices to ensure that projects are fully funded and feasible.
- o) **Adverse Weather Conditions:** In West Gem, public participation was hindered by poor weather, including rains and continuous drizzling, which led to late attendance and affected overall participation.
- p) **Insufficient Public Participation Budget:** The budget allocated for public participation was not satisfactory, limiting the effectiveness of the forums.

11. Success Stories & Positive Outcomes

- a) **North Uyoma:** The community was pleased that most of the projects planned for the previous year were either completed or ongoing. This shows that the county departments are effectively implementing projects, which boosts public confidence and support for government initiatives.
- b) **West Alego:** Several important projects were completed or initiated in this area, such as the establishment of a dispensary (Gangu Dispensary), a school feeding program, a borehole at Uradi Primary School, and the completion of an Early Childhood Development (ECD) center at Hawinga that had been stalled for 10 years. These developments indicate progress in healthcare, education, and water access, addressing key community needs.
- c) **South East Alego:** This ward has improved public participation by mapping out key stakeholders and effectively communicating with them through SMS, letters, and WhatsApp. This targeted approach has made public participation more inclusive and efficient, ensuring that diverse voices are heard.

- d) **North Ugenya:** The introduction of solar-powered water boreholes is providing a sustainable solution to the water challenges in the area, making water more easily accessible to the community.
- e) **Central Alego:** The construction of 21 Early Childhood Development Centers (ECDCs) and plans for more indicate a significant investment in early childhood education. The high level of project completion (85% compliance at the ward level) reflects a strong commitment to improving educational infrastructure.
- f) **West Uyoma:** The community in the Rachar sub-location expressed gratitude for the new Ojawa borehole, which is expected to solve the long-standing issue of water scarcity in the area
- g) **West Gem:** The presence of the County Executive Committee Member (CECM) for Finance & Economic Planning at the public participation forums was highly beneficial. He addressed key issues on the spot, particularly those related to Early Childhood Development (ECD) constructions, new road openings, and market sheds in West Gem ward, which might have otherwise escalated without his intervention.
- h) **West Asembo:** There was a notable increase in attendance at the forums. Residents expressed a high level of satisfaction with the public participation process, indicating a successful engagement.
- i) **Usonga:** Residents of the Usonga ward expressed happiness with the completion of the Usonga rice mill, which is expected to significantly enhance the rice value chain. They also appreciated that public participation forums continue to empower them in determining government project priorities.
- j) **South Uyoma:** All the ECD centers have benefited from the school feeding program provided by the county government. This initiative has been well-received and was considered a positive step toward improving early childhood education.
- k) **East Gem:** The Barkalare Resource Center has proven valuable in organizing community events. Additionally, most schools in the ward have fully furnished ECD classrooms, providing young learners with a conducive learning environment.
- l) **North Alego:** The cereal store in Nyalunya centre is a success story, indicating positive outcomes for local farmers and residents, likely through improved access to grain storage and distribution services.

12. Emerging Issues

During the public participation process, several emerging issues were identified, highlighting areas where improvements and attention are needed to enhance the effectiveness of county planning and development efforts:

- a) **Frequent and Inclusive Public Participation Forums:** Participants emphasized the need for more frequent and inclusive public participation forums. They suggested that such forums should be held throughout the year, not just during the preparation of the County Annual Development Plan (CADP). This would allow for ongoing dialogue between the county government and residents.
- b) **Capacity Building for Residents:** There was a clear need for capacity-building initiatives among residents to enhance their understanding of planning and budgeting processes. By increasing residents' knowledge and skills, they would be able to participate more meaningfully in the public participation process.

- c) **Public Proposals Missing in Approved Budgets:** Participants expressed frustration that their public proposals were often missing from the final approved budget, leading to reduced public interest in attending future public participation forums.
- d) **Limited Technical Capacity Among PMC Members:** The limited technical capacity among Project Management Committee (PMC) members has interfered with effective project implementation. Additionally, there was a lack of proper communication regarding the payment of PMC members, contributing to dissatisfaction and inefficiency.
- e) **Bias in Resource and Project Distribution:** Concerns were raised about bias in the distribution of resources and projects. For example, South East Alego, despite its vast size and population, received an allocation equal to other wards. Similar issues of skewed project distribution were noted in West Alego and North Alego, where certain sub-locations received more attention than others.
- f) **Political Interference in Priority Setting:** Political inclinations and rivalries were reported to sometimes interfere with objective discussions during priority setting and consensus-building in public participation forums. This interference has hindered the ability to reach fair and equitable decisions.
- g) **Information Access:** The use of the county website and gazette notices to disseminate information has limitations, as many community members find these channels inaccessible. This highlights the need for more inclusive communication strategies to ensure that all citizens are informed.
- h) **Transport Expectations:** Some community members expect to be provided with transport to attend public participation events. This suggests a barrier to participation for those who may live far from the meeting venues or lack personal transportation.
- i) **Community Awareness:** There is a growing expectation for improved service delivery, as the community becomes more informed and aware of their rights and the government's responsibilities.
- j) **Communication Modes:** The current reliance on gazette notices and websites is not effective in reaching the broader community, especially in rural areas. This issue calls for alternative communication methods that are more accessible.
- k) **Contractor Participation:** There was a suggestion that contractors should attend public participation meetings to clarify the details of projects they have been awarded. This would increase transparency and accountability, allowing the public to ask questions directly to those responsible for the work.
- l) **Concerns About Future Public Participation:** Due to the public's perception that their input on projects was not being adequately considered, there was concern that future public participation events may see a reduced turnout. Addressing this issue is crucial to maintaining community engagement and trust in the planning process.

13. Public Feedback and General Comments

The feedback from the public during the participation process was generally positive, with many participants expressing their appreciation for being given a platform to contribute to the county's development agenda. However, several concerns and issues were raised, indicating areas where improvements are needed:

- a) **Non-Payment of Allowances:** There were complaints regarding the non-payment of allowances to some Project Management Committee (PMC) members. Additionally, it was

reported that some projects were being implemented without the involvement of PMCs, leading to concerns about transparency and accountability.

- b) **Late Distribution of Documents:** Participants noted that the necessary documents for public engagement were often distributed late by the executive, hindering effective participation and informed decision-making.
- c) **Slow Implementation of FY 2023/2024 Projects:** The slow implementation of projects from the fiscal year 2023/2024 was observed across various wards, leading to concerns about the effectiveness of the county's development efforts.
- d) **Poor Workmanship in Road Projects:** There were complaints about poor workmanship in road projects, often attributed to inadequate budgetary allocations. Additionally, several roads have been opened but not maintained, limiting accessibility and hampering development.
- e) **Vandalism and Breakdown of Water Infrastructure:** Vandalism and breakdowns of water infrastructure projects were reported, along with concerns about poor workmanship in the construction of dams and water pans. These issues have limited access to a reliable water supply for residents.
- f) **Poor Waste Management in Markets and Urban Centers:** Poor waste management practices were noted, particularly in markets and urban centers. Delays in waste collection and the lack of designated dumping sites have contributed to unhygienic conditions.
- g) **Insecurity in Markets:** Insecurity in some markets was a significant concern, attributed to the breakdown of existing floodlights and the absence of floodlights in other markets, such as Nyagondo Market in West Gem Ward. Additionally, vandalism of market infrastructure, such as at Awelo Market, was reported.
- h) **High Demand for Services in Siaya Municipality:** Despite the high demand for services in Siaya Municipality, the municipality faces challenges due to low budgetary allocations. This mismatch between demand and resources has affected service delivery.
- i) **Lack of Feedback Mechanism:** There were concerns about the absence of a feedback mechanism from the executive, particularly regarding projects that had been factored into budget estimates. This lack of communication has led to skepticism about the implementation of public suggestions.
- j) **Hostile Contractors:** Complaints were made about rogue and hostile contractors who were awarded contracts. These contractors were accused of performing substandard work and being intolerant of the community's input.
- k) **Project Modifications:** There is a tendency to modify public proposals during the project approval process, leading to complaints that the final projects often differ from what was originally proposed by the public.
- l) **Delayed Payment of Casual Wages:** Delays in the payment of casual workers have led to unhygienic conditions in markets and urban centers. Waste management officers are also exposed to health risks due to inadequate protective measures.
- m) **Lack of Information on Projects:** Participants expressed frustration over the lack of adequate information about ongoing projects, particularly regarding the implementing agencies and contractors. This opacity has led to confusion and potential corruption.
- n) **Exclusion from AGPO Tenders:** Special interest groups, including youth, women, and Persons Living with Disabilities (PLWDs), reported being excluded from Access to

Government Procurement Opportunities (AGPO) tenders, which are intended to be reserved for them.

- o) Non- operational County Machinery:** Concerns were raised about county government machinery, such as tractors, being available but not operational due to a lack of fuel and timely maintenance. This has hindered efforts to enhance food security in the county.
- p) Agricultural Subsidies:** The public appreciated the county government's provision of agricultural subsidies but pointed out that these subsidies were inadequate and lacked variety, such as different types of seed
- q) Health Facility Equipment and Staffing:** There were widespread complaints about the lack of equipment in newly constructed health facilities, a shortage of drugs, and inadequate staffing.
- r) Under-Equipped ECDE Centers:** Participants reported that some newly constructed ECDE centers lacked proper equipment, and there were insufficient numbers of employed ECD teachers.
- s) Waste Management and Dump Sites:** There was a general outcry about the lack of designated dump sites and poor garbage collection strategies implemented by the county government.
- t) Publicity of Flagship Projects:** While the county government was commended for its work on capital and flagship projects, participants observed that there was room for improvement in the publicity of these projects.
- u) Gold Mining Regulation:** It was suggested that gold mining activities in Siaya County, particularly in Central Sakwa, should be better regulated and streamlined.
- v) County Bursary Allocation:** The need to enhance transparency and accountability in the allocation of county bursaries was highlighted. Participants suggested using roadshows for better publicity of the bursary process.
- w) Stakeholder Mapping:** It was recommended that stakeholder mapping be undertaken at the ward level to widen the network of relevant participants for public engagement.
- x) Integrity of Public Proposals:** Participants stressed that projects proposed by the public should not be altered, as this would help build and maintain public confidence and trust.
- y) Strengthening Project-Based PMCs:** There was a call to prioritize the capacity building of project-based PMCs to ensure proper supervision of projects
- z) Operationalizing Constructed Facilities:** The need to operationalize constructed ECDEs and health centers was highlighted, with participants urging the county government to prioritize these actions.
- aa) Completion of Stalled Projects:** There were calls to prioritize the completion of stalled projects, such as the Wagai Multi-Media Resource and Learning Centre.
- bb) Attendance by CECM:** Participants encouraged the attendance of the County Executive Committee Members (CECM) at public participation exercises to enhance engagement and accountability.
- cc) Skewed Project Allocation and Contractor Favouritism:** Complaints were made about the skewed allocation of projects, with some wards receiving more projects than others. Additionally, concerns were raised about a single contractor being awarded multiple tenders, leading to potential favouritism and unfair distribution of work.

dd) Pre-Award Project Implementation: It was noted that some contractors began work on projects even before tenders were officially awarded, raising concerns about the transparency of the tendering process.

ee) Lack of Feedback on Citizen Input: Despite advisories from the County Budget and Economic Forum (CBEF), a feedback mechanism to track the implementation of citizen input still does not exist, leading to frustration among participants.

14. Summary of Key Proposals Made

Having reviewed all the proposals made by citizens and other stakeholders ie CSOs during the public participation forums and consultations (*Annex 4*), the following key proposals per sector required consideration in the CADP as follows:

a) Agriculture

- i. Expand tractor hire services to enhance agricultural productivity by improving the efficiency of farming operations.
- ii. Construct a cold room for horticulture to support the preservation of perishable horticultural produce, reducing post-harvest losses and increasing marketability.
- iii. Provision of subsidized seeds and fertilizers to farmers with affordable inputs to boost productivity and ensure food security.
- iv. Cattle and dairy goat keeping to support livestock farming, improving livelihoods and food security.
- v. Apiculture (Beekeeping) to promote beekeeping for honey production, enhancing agricultural diversity and income.

b) Water and Sanitation

- i. Desilt dams to facilitate water storage capacity and reduce flooding risks.
- ii. Repair and maintenance of springs and boreholes ensure reliable access to clean and safe water.
- iii. Pipeline extensions and water kiosks to expand water access to underserved areas.
- iv. Drilling and equipping boreholes to improve access to potable water, supporting domestic and agricultural needs.

c) Roads and Transport

- i. Opening, grading, and culverting of roads to improve road infrastructure, facilitating transportation and access to services.
- ii. Tarmacking and maintenance of roads to enhance road durability and reduce travel time.

d) Health

- i. Construction and equipping of health facilities to improve healthcare delivery by providing better facilities and equipment.
- ii. Upgrading health centers to enhance the capacity of health facilities to provide comprehensive services.
- iii. Construction of GBV rescue centers in Ugenya, Alego Usonga, and Bondo sub-counties.
- iv. Upgrade emergency sections at Siaya County Referral Hospital.

- v. Allocating funds for reproductive health promotion and establishing mental health clinics in all sub-counties.
- vi. Provision of drugs and NHIF coverage to ensure availability of medical supplies and access to health insurance for vulnerable populations.

e) Education

- i. Construction and Equipping of ECDE Centers to support early childhood education by providing necessary infrastructure and resources.
- ii. Bursary Allocation to support educational access and retention by providing financial assistance.
- iii. Establishing digital hubs and modernizing equipment in VTCs.
- iv. Hiring skilled instructors and renovating VTCs.
- v. Youth & Women Empowerment by establishing a county youth, women, and PWDs revolving fund.
- vi. School feeding Programme in ECDE centers to increase enrollment and support nutrition to students.

f) Trade

- i. Modern market construction and renovation to enhance trade infrastructure, supporting local businesses and markets.
- ii. Provision of revolving funds to support entrepreneurship and small business development.
- iii. Improve garbage collection, drainage, water access, and security in markets.

g) Tourism

- i. Sponsorship of sports and cultural events to promote local talent and cultural heritage, boosting tourism and community engagement.
- ii. Construction of cultural centers to provide cultural activities and tourism development spaces.

h) Governance

- i. Employment of Village Administrators to enhance local governance and administration, improve service delivery, and establish devolved offices in each ward.
- ii. Establish a framework for effective public participation in the county.
- iii. Operationalize the Siaya County Equitable Development Act, 2019.
- iv. Develop Siaya County civic education curriculum and training manual.

10. Environmental Management

- i. Gazette County forests and developing a master plan along with climate change regulations.
- ii. Tree Planting and environmental conservation to support biodiversity and environmental sustainability.
- iii. Establishing efficient waste management sites and supporting rehabilitation of wetlands, dams, and water pans.

15. Recommendations for the Future

Based on the insights and feedback gathered during the public participation process for the CADP 2025-2026, the following recommendations are proposed to improve future planning cycles:

- a) **Enhance Publicity and Outreach:** Increase efforts to publicize participation forums, particularly in remote areas, to ensure higher turnout and broader representation. This can be achieved through targeted communication strategies, including the use of local media and community networks.
- b) **Continuous Public Engagement:** Establish mechanisms for ongoing public engagement throughout the year, enabling continuous dialogue between the county government and residents. This would keep the public informed and involved in the planning process.
- c) **Public Training Programmes:** Implement training programs to improve the public's understanding of the CADP process, empowering them to make more informed and meaningful contributions during participation forums.
- d) **Feedback Mechanism:** Develop a system for providing feedback to the public on how their input has been incorporated into the final plan. This would enhance transparency and build trust in the planning process.
- e) **Diversified Input Collection Methods:** Explore additional methods for gathering public input, such as online platforms to reach a wider audience, especially those unable to attend physical forums.
- f) **Fast-Track Project Management Policies:** Expedite the approval and implementation of project management policies to ensure that projects are well-coordinated and managed effectively.
- g) **Strengthen Civic Education:** Enhance civic education efforts and ensure that all necessary documents are shared with the public well in advance of participation forums to facilitate constructive and informed discussions.
- h) **Align Planning with Political Support:** Strengthen political goodwill among Members of the County Assembly (MCAs) and the Executive to ensure that planning and budget documents are properly aligned with public needs and priorities.
- i) **Encourage AGPO Compliance:** Motivate youths, women, and people living with disabilities (PLWDs) to bid for tenders, while urging the executive to comply with the Access to Government Procurement Opportunities (AGPO) recommendations to promote inclusivity.
- j) **Contractor Sensitization:** Sensitize contractors on the importance of public relations to foster harmonious relationships with the community during project implementation, ensuring that community concerns are addressed.
- k) **Timely Payment of Wages:** Ensure the timely payment of casual wages to maintain hygiene in markets and urban areas, including municipalities, and prevent delays that can lead to unsanitary conditions.

- l) **Provision of Protective Gear:** Provide market cleaners and other waste management personnel with adequate protective gear to safeguard their health and safety during their work.
- m) **Project Signage:** Implement clear signage on all projects to provide transparency about the implementing agency and other relevant information, helping the public stay informed about ongoing development activities
- n) **Strengthen Tractor Hire Services:** Strengthen the Tractor Hire Services programme by creating a revolving fund to ensure the availability of fuel and timely maintenance of tractors, thereby boosting mechanized agriculture.
- o) **Adequate Agricultural Subsidies:** Ensure the provision of adequate subsidies for key value chains, such as maize and rice, as well as fertilizers, to support agricultural productivity and food security in the county.
- p) **Online Community Engagement:** Create an online community engagement platform to allow residents who cannot attend in-person sessions to participate online or access recorded sessions later. This would increase participation and ensure that more voices are heard
- q) **Construct Ward Administrator Offices:** Build offices for Ward Administrators to improve coordination and facilitation of public participation and civic education at the ward level, making these processes more accessible and effective.
- r) **Early Distribution of Documents:** Ensure that public participation reference documents are printed and distributed early enough to allow participants ample time to review and prepare for engagement sessions.
- s) **Collaboration with Chief's Offices:** The office of the Ward Administrator should collaborate closely with the Chief's office during mobilization and public sensitization efforts to enhance citizen engagement initiatives across the county.
- t) **Water Pipeline Extensions:** Participants recommended prioritizing freshwater pipeline extensions over drilling water boreholes, some of which are salty
- u) **Budgeting for Maintenance:** Participants emphasized the need to budget for the maintenance of roads and the operationalization of already constructed ECDEs and dispensaries, rather than focusing on constructing new facilities
- v) **Decentralized Participation:** Public participation should be further decentralized to the village or sub-location level, making it easier for more people to participate.
- w) **Effective Communication:** SMS, letters, WhatsApp, and public announcements by the PA system on a vehicle were recommended to enhance communication and ensure that important information reaches all community members.
- x) **Stakeholder Mapping:** Regularly updating and reviewing the list of stakeholders ensures that all relevant parties are included in the public participation process.
- y) **Ward Development Fund:** There is a call for the Executive to sign the bill establishing the Ward Development Fund, as the current allocation is deemed insufficient to meet the development needs of each ward.
- z) **Grassroots Engagement:** Public participation should start at the village unit and sub-location levels before moving up to the ward level, ensuring that the process is comprehensive and inclusive from the ground up
- aa) **Focus on Job Creation:** Future planning should prioritize job creation, particularly in agribusiness and artisanry, to address unemployment and stimulate economic growth.

- bb) **Roll Out New PMC Policy:** The implementation of the new Project Management Committees (PMC) policy should be expedited to ensure better oversight and management of projects.
- cc) **Increase Public Participation Budget:** The budget for public participation should be increased in future planning cycles to accommodate rising costs and ensure more effective engagement
- dd) **Ensure Technical Officer Attendance:** All technical officers who supervise projects in the wards should be required to attend public participation forums to provide expert insights and address technical queries.

Conclusion

The public participation process for the Siaya County Annual Development Plan 2025-2026 was a valuable exercise in democratic governance, allowing residents to shape the county's development priorities. While there were challenges, the process was largely successful in capturing the views and aspirations of the public. Moving forward, there is a need to build on the lessons learned to enhance future public participation efforts, ensuring that the development agenda of Siaya County remains inclusive, transparent, and responsive to the needs of its citizens.

Jared Abayo

Director, Public Participation & Civic Engagement

County Government of Siaya

ANNEX 1: PUBLIC NOTICE/ADVERTISEMENT

COUNTY GOVERNMENT OF SIAYA

INVITATION OF PUBLIC VIEWS ON PREPARATION OF COUNTY ANNUAL DEVELOPMENT PLAN (CADP) FOR FY 2025/2026

The County Government of Siaya is preparing the County Annual Development Plan (CADP) for the Financial Year 2025/2026. The CADP outlines strategic priorities for the medium term that reflect the County Government's priorities. The document will also provide details of programmes and priorities to be implemented in light of the prevailing financial and economic environment. The CADP 2025/2026 shall be the third in the series of ADPs prepared under the 3rd generation County Integrated Development Plan (CIDP)- 2023-2027.

The Constitution of Kenya 2010 and the Public Finance Management Act of 2012 provide for public participation in the formulation of policies. Therefore, the County Government of Siaya invites the public to the upcoming public engagement meetings on the CADP in all the wards from 19th to 23rd August 2024. While preparing for the engagement, stakeholders are advised to relate with the thematic areas listed below and the CIDP 2023-2027 on the County Website www.siaya.go.ke, focusing on year three targets.

Sector	Goals	Strategies
Agriculture and Livestock	Food and Nutrition Security	• Extension, input, and subsidy support services • Promote program-based anchor value chains • Development of aggregation, storage, transportation, and off-take systems • Promote irrigated agricultural production • Promotion of youth and women Enterprise in Agriculture • Expert staffing aligned to anchor commodity and industry • Promote climate change resilience practices in the value chains
Health and Sanitation	Provision of accessible, quality, and affordable healthcare	• Strengthen the capacity for service delivery in health • Strengthen the community health promoters' framework • Strengthen disease surveillance, data collection, and reporting systems • Construction and maintenance of new and existing health infrastructure in levels 1,2,3 &4 • Support the optimal operation of existing level 1, 2, and 3 health facilities

Sector	Goals	Strategies
		- Strengthen the supply chain for medical supplies and commodities - Develop and implement a comprehensive health management system that integrates all aspects of health
Water, Environment and Natural Resources	Provision of safe water and sewerage services to all	- Develop the Siaya County water policy and masterplan - Upgrade, modernize and expand existing water infrastructure - Increase sewerage connection in all the urban centers
	Environment conservation and management	- Improve tree cover with a focus on fruit trees - Promote sustainable water harvesting technologies; - Sustainably conserve wetlands and catchment areas - Build climate change resilience within the community
Transport and Energy	Effective and efficient movement of goods and people	- Upgrading of selected link roads to bitumen standards - Opening, grading, and graveling of new roads - Maintenance of existing roads, bridges and culverts
	Sustainable energy solutions	- Preparation of Siaya County Energy Masterplan - Promote alternative energy sources - Establish energy innovation centers
Lands, Housing, Physical Planning and Municipalities	Sustainable land use and urban development	- Develop urban infrastructure within Municipalities - Operationalize a GIS laboratory - Approval and implementation of the valuation roll - Demarcate and secure all public lands to reduce encroachment
	Provide affordable and decent housing units for all	- Develop and implement a housing plan - Establish a county headquarter - Develop affordable housing in collaboration with the National Government
Education, Social Protection, Culture and Recreation	Effective ECDE and Vocational training	- Establish new ECD centers - Equip existing ECD centers and VTCs - Recruit ECD and VTC instructors - Provide requisite equipment and learning materials in ECDs and VTCs - Enhance school feeding programs
	Equitable and inclusive access to social services	- Establish a child rescue and recovery center - Establish substance abuse, counseling, and rehabilitation center - Develop social amenities for the all vulnerable groups - Provide bursaries and scholarships for vulnerable children - Strengthen county library services
Trade, Industrialization, and Tourism	Increase Sustainable Livelihood Incomes	- Improve aggregation of agricultural produce - Establishment of end-market for agricultural produce - Strengthen producer-consumer linkages

Sector	Goals	Strategies
		• Enhance compliance with fair trade practices and alcoholic drinks control • Develop infrastructure to promote tourism • Identification, preservation, and development of cultural and natural heritage sites • Develop a sports strategy for the county • Develop infrastructure to support sports → Facilitate county tournaments and sports festivals

Memoranda can be addressed and submitted to the undersigned in hard copies while soft copies are to be sent to epanning@siaya.go.ke by 23rd August 2024. Please note the venues for the specific ward engagements as scheduled.

NB: These fora will be held from 10.00 am.

ANNEX 5.: MEMORANDA RECEIVED ON CADP

1. CIVIL SOCIETY ORGANIZATIONS (CSOs)

Health	1. -Construction of rescue centers for GBV- 3rescue centres Ugenya (Ukwala Sub-County Hospital) Alego (in SCRH) and Bondo (in Bondo Sub-County Hospital)
Health	2. -Employing skilled staff to manage people living with disabilities in the major health facilities in Siaya
Health	3. -The establishment of mental health clinics in the 6 Sub counties should be mainstreamed in the sub-county hospitals and county referral hospitals.
Health	4. -Health promotion on sickle cell anemia at the community level
Health	5. -Efficient ambulance services 1 per sub-county and more at the Siaya Referral Hospital
Health	6. -Strengthen facility improvement funds to allow facilities to withhold funds/revenues for emergency services such as fueling of ambulances and other operations
Health	7. - Provision of electricity at Lela Dispensary in Central Gem ward
Health	8. -Allocate at least ksh 3,000,000 for reproductive Health promotion community forums in Siaya
Health	9. -Renovate and upgrade the emergency section at the Siaya County Referral Hospital
Health	10. -Construct a one-room block at Mulaha Dispensary to be equipped as a youth-friendly center by existing partners in the health sector
Agriculture	1. -Extensive irrigation programs to support farmer groups in Yala Swamp, Alego Usonga ,Bondo, and Kolola in Ugenya
Agriculture	2. -Establishment of public demo farms to support farmer groups at least one per sub-county or revive the ATC to support learning for farmers.
Agriculture	3. -Establishment of fish processing plants in lake bordering sub-counties (Usenge and Lwanda Kotieno)
Agriculture	4. -Periodic government-sponsored livestock extension services
Agriculture	5. -Subsidizing seeds and fertilizer
Agriculture	6. -Subsidize tractor-hired services in the county-increase the number of tractors by 6
Agriculture	7. -Establishment of agro-based processing facilities for the following value chains; poultry, sunflower and honey
Agriculture	8. -Provision of simsim, cassava, groundnuts, sunflower, and cotton seeds to farmers
Agriculture	9. -Establish a small revolving fund kitty to support youth Agri-entrepreneurs in Siaya County
Agriculture	10. -Establish a value chains knowledge hub in the development website to facilitate e-extension and learning for youth agri-prenuers and other farmers in Siaya

Water	1. -Gazettement county forests Mbaga, Rambugu, Got Akara, Ager,Got Rembo, Got Nyandiwa, Rawalo,Gotv Abiero, Naya
Water	2. -Develop a county forest master plan and Climate Change Fund Regulations for Siaya
Water	3. -Develop a county climate change adaptation and mitigation strategy
Water	4. -Establishment of efficient waste management sites in Ukwala, Yala, Ngiya, AKala, Usenge and Ndori.
Water	5. -Revival of YESISE water project in Ugenya subcounty to serve Ukwala and North-Ugenya wards
Water	6. -Initiate regulation of fish cage farming to avoid metal waste deposition in the lake
Water	7. -Develop and implement a county communication framework for climate governance structures in Siaya
Water	8. -Support the review of Siaya County Climate Change Act 2021
Water	9. -Supporting land reclamation and rehabilitation in gold mines and quarries in Nango, Ndira, Wagusu, Aduwa, Kgilo, Sirembe among others.
Water	10. - Support an affirmation action programme to facilitate women, youth and PWD's benefit in county climate actions program and finances including FLLoCA
Water	11. -Support rehabilitation and protection of wetlands, dams and water pans ie Mala River, Koya Dam, Miruka pan, and Kanyaboli ecosystem including the Yala wetland.
Water	12. -Establishment of a green space in Ng'iya Market
Water	13. Support household clean cooking initiative in Siaya County, -Energy cooks stoves -Engage women led and youth groups to scale the clean cooking initiative
Water	14. Support community groups of women, youth and PWD's to establish 3 community-led climate information and learning spaces. Demonstrating different adaptation and mitigation initiatives in water, agriculture, sustainable land management practices, agroecology, green energy among others.
Water	15. Support community groups of women youths and PWD's to establish modern community tree nurseries with both exotic and Indigenous trees to facilitate access to tree seedlings in Siaya
Water	1. Train community groups of women on agroecology and sustainable land management practices
Education	1. Establish digital hubs in one VTC per sub-county to support digital learning
Education	2. -Diversification of sports and talents and supporting various sporting disciplines - skating, dancing, boardgames (chase and scrabble), theater and Paralympics,
Education	3. - Modernizing learning equipment at the existing VTCs in Siaya
Education	4. -Hired 40 skilled VTC instructors for the existing VTCs in the County
Education	5. -Renovation of VTCs; Nyasanda , Malunga, Lucy Onono and Naya
Education	6. -Training of women youths and PWDs on procurement processes and supporting them to access AGPO certificate

Education	7. -In kind support to women, youths and PWDs eg hairdressing and Beauty Therapy, Tailoring and Dress Making Electrical Installation, plumbing, handcrafts
Education	8. -Supporting nurturing care sessions for young mothers in Siaya County (Allocate at least ksh 3,000,000 in FY 2025-2026)
Education	9. -Establish a county youth woman and PWDs revolving fund to support their entrepreneurship / business enterprises
Education	10. -Operationalization and digitalization of the existing youth resource centers eg Karemo Resource and Mutumbu Resource
Education	11. -Full implementation of feeding programme in all ECDE and VTC centers to increase enrolment and retention.
Education	12. -Increase the County Bursary to ksh 200,000,000
Education	13. -Organize and support Siaya County Youth/ Women /PWDs innovation and investment week
Education	14. -Finalization of Siaya County Youth Development policy
Education	15. Finalization of Siaya County Gender Equality and Empowerment Bill
Education	16. -Establish an apprenticeship program for youth and women from the VTCs in Siaya supporting their enrolment into existing SME's in Siaya
Education	17. -Develop a county business model training /mentorship toolkit for youth, women, and PWDs. This will enable the gender officers, youth coordinators, women, and PWD's coordinators to conduct entrepreneurship mentorship to existing groups of youth, women, and PWD'S
Governance	1. -Operationalization of Siaya County Equitable Development Act 2019
Governance	2. -Development of civic education Curriculum
Governance	3. -Building of devolved offices in each ward
Governance	4. -Employment of village administrators
Governance	5. -Establish/formulate Siaya County strategy and framework for effective public participation.
Trade	1. -Establishment of a revolving fund and cooperative development fund for business groups in Siaya
Trade	2. -Establish effective garbage collection points in existing large and medium markets in Siaya County
Trade	3. -Improve drainage, water access, toilets, and security lights in the existing markets in Siaya eg Ukwala , Usenge, Boro, Ngiya, Kogelo, Malanga, Nyadorera, Mwer, Onyoro and Ndere among others.

2. WOMEN

Health	1. -Installing water in the maternity wing at Mulaha Dispensary.
Health	2. -Establishment of a dental unit at Madiany Sub County Hospital in West Uyoma
Health	3. -Provision of drugs and employment of an additional 3 nurses at Mulaha and Misori dispensary

Health	4. - Provision of water electricity and drugs in Gangu, Dienya, and Hawinga Dispensaries.
Health	5. -Construction of GBV rescue centers in \3VA at least one sub-county hospital in each Sub-county.
Health	6. -Set up mental health centres in at least one Sub-County7 hospital per sub-county in Siaya.
Health	7. -Provision of efficient ambulance services in all the Sub-County hospitals.
Agriculture	1. -Provision of quality seeds and fertilizers to farmers in Siaya Township and West Uyoma which should be distributed in a structured manner
Agriculture	2. -Strengthen veterinary services to deal with livestock diseases in Siaya Township and Nyabera Sub-location.
Agriculture	3. -Reviving/operationalizing Nyawara animal feed mill in Central Gem Ward.
Agriculture	4. -Provision of dairy goats to farmers in Randago, Bar Osimbo, and Malanga in the South East.
Agriculture	5. -Provision of machines to sunflower farmers for grinding sunflower
Agriculture	6. -Distribution of upgraded piglets to farmers
Agriculture	7. -Support poultry farmers to strengthen the value chain in Siaya- establish aggregation centres per Sub-County
Agriculture	8. -Establish at least 2 county-based poultry feed processing enterprises in the county to reduce the cost of poultry production in Siaya (Department to work with existing women groups to set up the enterprise as a source of employment for women)
Agriculture	9. -Provision of groundnut seeds to farmers and establish an agro-processing enterprise for groundnuts through partnership with community-based women groups in the groundnut value chain
Agriculture	10. Establish an independent fish market in Siaya town with cold stores and adequate sanitation
Water	1. -Revive the stalled borehole at Agoro Lieye Primary School
Water	2. -Revive stalled water projects in West Uyoma Nyabera Magare Village
Water	3. -Drill borehole or piped water at Awelo market
Water	4. -Installation of water kiosk in Jua Kali Community, West Gem Ward
Water	5. -Promote and support clean cooking technologies in Siaya through working with women groups trained as artisans
Water	6. -Construction and distribution of clean energy cookstoves to households in Hawinga , West Alego
Water	7. -Support 3 community women ambassadors in climate action to attend COP 29 and showcase their work
Water	8. -Spring water at Kamani village, Barding
Water	9. -Construction of a dam at Kamuga in South East Alego.
Water	10. -Construction of boreholes at Kamwani and Kamonge Village in South East Alego
Water	11. -Maintenance of boreholes in Kadito, Got Koyembe , Ochota in S.E and Got Oyenga in North Alego

Water	12. -Affirmative action to support women's climate action projects through the FLLoCA FUNDS IN Siaya.
Water	13. -Identify and train women ambassadors in climate action in Siaya County including profiling their work and showcasing it in different platforms to support them access opportunities in climate action space
Education	1. -Completion of ECDE class at Nyabera school in West Uyoma
Education	2. -Construction of TVET facility at Siaya Township
Education	3. -Construction of an ECDD Centre and employment of teachers at Mirando School West in Uyoma
Education	4. -Construction of ECDE classes and employment of ECDE teachers at Uyonga ECDE and Bar Katado ECDE
Education	5. -Equipping of Nyadondo Polytechnic and employment of teachers
Education	6. -Equipping of Nyanaganga, Usingo , Rakuom and Nyanginja schools in Bar Agulu,South East Alego
Education	7. -Improve the existing VTCs in Siaya with modern training equipment
Education	8. -Establishment of a revolving fund to support the growth and expansion of women-owned businesses in Siaya
Education	9. -Train women groups on entrepreneurship and village saving models to improve their business skills and saving capacities
Education	10. -Support women through existing groups to set up a women-led micro-finance to increase access to loans with limited collateral. Set up funds to match their contributions in the model.
Education	11. -Organize mental health awareness forums at the ward level targeting especially young women.
Education	12. -Support apprenticeship for young women in the vocational Training Centers in Siaya
Trade	13. -Proper drainage and waste disposal at Siaya Modern Market and Aram Market
Trade	14. - Employment of security officers in Siaya Modern Market and Aram Market
Trade	15. -Construction of a modern market in Misor, West Uyoma
Trade	16. -Completion of Awelo Market
Trade	17. -Create a cooperative society for women only where they can easily access loans at lower interest rates
Trade	18. -Construction of a modern market in Hawinga
Trade	19. -Construction of a market at Bar Osimbo in South East
Trade	20. -Provision of loans to women eg mama mboga groups
Trade	21. -Improve infrastructure in the existing markets in Siaya eg Ndere,Umala, and Kobare including improving water access, toilets, and security lights.
3. YOUTH	
Health	1. Stocking Ober Ogunga health center with drugs

Health	2. -Address understaffing of health facilities at Siaya Referral and Mulaha Dispensary
Health	3. -Set aside allocation for the establishment of youth friendly environment
Health	4. -Equipping Ndere, Sikalame, and Sigomere health centers with medicine (condoms, prep, peps, ARVs, and additional health staff)
Health	5. -Installation of special clinics for PWDs and existing health centers in Siaya
Health	6. -Construction of maternity at Masinya Health Center
Health	7. -Provision of enough drugs to health centers
Health	8. -Employ at least 3 Cos at Manyuanda and Obaga health centers
Health	9. -Construct maternity wards at Obaga
Health	10. Recruit peer educators at the community to promote access to sexual reproductive health education
Health	11. -Construction of GBV recovery and rescue center in Ukwala Hospital, Ambira Hospital, Sigomere Hospital and Siaya County Referral Hospital
Agriculture	1. -Provide registered youth groups with water pumps
Agriculture	2. -Establish smart farms in Ndere VTC to encourage young farmers
Agriculture	3. -Provision of fingerlings to farmers around Lake Kanyaboli
Agriculture	4. -Building a fully equipped Agricultural Product Aggregation Centre in Ugunja center
Agriculture	5. -Devolve tractor services at the Sub-County level and enhance communication channels to acquire the services
Agriculture	6. -Affirmative action for youth labor-based opportunities at the department
Agriculture	7. - Establish <i>Vijana-Na-Agribiz fund</i> to support young agripreneurs access revolving fund
Agriculture	8. -Construction of fish store with cooling systems in Usenge
Agriculture	9. -Installation of antiparasitic spray systems in Bondo and Awello
Agriculture	10. -Support Siaya Lake region entrepreneurs to establish fish ponds
Agriculture	11. -Capacity building extension officers for better performance
Agriculture	12. -Increase the number of tractors to reduce jam experienced during the ploughing season
Agriculture	13. -Start aggregation centers for farm produce
Agriculture	14. - Establish an agro-processing enterprise for honey in Siaya run by youth and support the youth in apiculture to access KEBS certification for the honey products
Agriculture	15. -Investment in fruit tree farming ie grafted mangoes, avocados, and oranges value addition training
Agriculture	16. - Conduct community soil management training
Agriculture	17. -Engage and invest in livestock farming, especially for youth groups

Water	1. -Provide garbage sorting bins at the market centers in Ugunja Sub-County to separate bio and non-bio-degradable waste for the benefit of youths in organic farming
Water	2. -Water tank and solar system at Ujimbo Primary School
Water	3. -Replacing and fencing water pumps at Rambo Water Projects
Water	4. - Support existing Youth Groups producing Black Solder Fly in Siaya to scale up the enterprise as a green innovation through the FLLoCA Funds
Water	5. -Planting of trees at Maware and near roads along Bondo town
Water	6. -Install irrigation systems in Aila, Bar Opuk and Kadianga
Water	7. -Install solar irrigation systems in Siruana
Water	8. -Improve water management at Bondo Town
Water	9. -Develop a departmental youth engagement strategy in Environmental and Climate Change Action in Siaya
Water	10. -Planting of bamboo along the rivers in Siaya County to conserve the riparian areas along the rivers eg River Nzoia and River Yala
Water	11. -Maintain water basin for livestock near Korwa and Kawino Dams
Water	12. -Erect water purifiers at the dam point
Water	13. - New water pumps for West Uyoma Water Projects
Water	14. -Increase and improve the reach of the Sibbo water project in Kodiaga, Gongo and Sirembe
Water	15. -Identify young environmental and climate change ambassadors in Siaya County
Education	1. -Feeding program for ECD (Nyajuok, Rabango and Gendro)
Education	2. -Skilling youth by programming for driving classes
Education	3. -Modern assistive devices and improved wheelchairs for people with disability
Education	4. Implement affirmative action for all tenders awarded in the department to ensure youth benefit through labor-based opportunities
Education	5. Teach youths how to get 30% tender allocation
Education	6. constructing a fully equipped ICT hub in Ugunja Center
Education	7. Announce a training mechanism for youth on the Government tendering process, company registration, and access to the AGPO certificate
Education	-Install public wifi in Bondo
Education	8. - Increase bursaries and scholarships for youths and colleges, allocate at least ksh 300,000,000
Education	9. -Capitation in VTCs
Education	10. - Improve infrastructure and training equipment at Komoro VTC

Education	11. -Construction of one youth hub (Youth Integrated Center of Excellence) to enhance access to information, online learning and research, online jobs, indoor games, among others
Education	12. -Sanitary towel dispensers at health centers and public school
Education	13. -Construction of new ECD at Nyabera Primary and provide learning materials
Education	14. -Effectively execute bursary vetting and award process in Siaya County
Education	15. - Equip Ndhine, Ndere, Malunga, and Nyandondho VTCs with ICT facilities building, motor vehicles, engineering, fashion, and design
Education	16. -Facilitate KNEC exams for the above VTCs
Education	17. -Renovate Ulamba and Gongo ECD roofs
Education	18. -Establish a youth revolving fund in the department to support youth enterprises
Education	19. - Organize and support Youth investment and innovation expo to showcase the potential of youth in creating employment and linking them to existing investors and the private sector to support them
Governance	1. -Budget on web development and maintenance
Governance	2. -Invest in information dissemination through radios and village-based forums
Trade	1. -Establish digital line tax collection
Trade	2. -Revive stalled markets at Awelo
Trade	3. - Set allocation to sensitize the community on how to form quality co-operatives
Trade	4. -Sensitization on digital skills and marketing
Trade	5. -Improve security lights at Sidindi Market
Trade	6. -Equipping the already built market structures
Trade	7. -Reduce business registration fees and reduce tax burden
Trade	8. -Boost Bondo Market cleanliness
Trade	9. -Build a modern market at Bar Kober
Trade	10. - Construction of modern market at Ukwala and Luhano
Trade	11. -Employ cleaners at Uhuru market in East Ugenya
Trade	12. -Start water sources at Anyuongi market
Trade	13. -Erect street lights at Nyabera market
Trade	14. -Reduce taxes for trade stability
Trade	15. -Improve security at Aram market
Trade	16. -Enhance training on cooperative development for youths
Trade	17. -Install market facilities eg lighting, landscape, waste management, and sewerage in Nyangweso, Kodiaga, Nyagondo, Wagai, Ngiya, and Sirembe

Trade	18. -Repair of Bar Ogwato light
Roads	1. Maintenance of Ogwato-Nyalgunga road
Roads	2. -Tarmac Savana- Ambira hospital road and Kakoth-Sikang road
Roads	3. -Install culverts on Sidindi-Ndere Health Center Road via Rambo
Roads	4. -Install bumps at Uref Junction(Uref Primary School and St. James hospital) to reduce accidents on school kids
Roads	5. -Improve Abom- Usenge Road
Roads	6. -Open Uhuru-Onyango Road-Barchando Road
Roads	7. -Maintain Aram-Kokara Road
Roads	8. -Clear roadside for visibility for Misoro-Kawaka Road
Roads	9. -Tarmac Fuludhi-Sirembe -Kodiaga Road
Roads	10. -Affirmative action in the roads and public works department in Siaya through youth-based labour.
Roads	11. Enforce a strategy that will ensure each contractor awarded a tender in the department MUST demonstrate that youth have benefited at least 30% of work through a labor-based approach in roads, buildings, construction, etc. This should be clear in the contracts signed by each contractor and the department should have a focal person to ensure compliance. Some youth to be considered as the first beneficiaries are those in the VTCs in Siaya as an apprenticeship strategy and access to income to buy start-up equipment for themselves.

4. PEOPLE WITH DISABILITIES (PWDs)

Education	1. - Consider employing PWDs as teachers ie deaf
Education	2. -Disability coordinators' offices to be equipped to assist in the registration of PWDs and PWD groups
Education	3. - Provide PWD caregivers.
Education	4. -PWD ECDE buildings and equipment's to be allocated
Tourism	5. -Promotion of sports and all sporting activities for PWDs.
Tourism	6. -Provide indoor sports halls ie at the county stadium and sub-county halls.
Tourism	7. - Allocate funds for sports in all wards.
Tourism	8. -Provide a budget for Mr and Mrs Siaya's disability
Tourism	9. -Allocate funds for PWD groups to do free nurseries.
Water	-Provide piped water to sheltered workshops.
Agriculture	1. -Crop farming and other farming be designed to include PWDs
Agriculture	2. - PWD farmers to get seeds, and tractors for special allocation.

Health	1. -Register PWDs on NHIF cover
Health	2. - Special beds in maternity wards
Health	3. -Universal standard toilets and spaces (Disability free)
Health	4. - Devolving disability assessment for sub-counties at a subsidized cost.
Health	5. -Disability assessment funds to be provided
Health	6. - Provide free drugs to epileptic PWDs
Health	7. Hospital), Alego (in SCRH), and Bondo (in Bondo Sub-County Hospital)
Health	8. -Employing skilled staff to manage people living with disabilities in the major health facilities in Siaya
Health	9. -Establishment of mental health clinics in the 6 sub-counties- should be mainstream in the sub-county hospitals and county referral hospital
Health	10. -Health promotion on sickle cell anemia – at the community level
Health	11. -Efficient ambulance services; 1 per sub-county hospital and more at the Siaya Referral

5. YALA SUB COUNTY HOSPITAL

Health	1) Construction of an in-patient complex to contain: ▪ 30-bed male medical ward ▪ 30-bed female medical ward ▪ 30 -bed pediatric ward ▪ Kitchen ▪ Laundry 2) Construction of facility perimeter wall to contain: ▪ Perimeter fence ▪ 4 gates and gatehouses 3) 16 door modern toilets
--------	--

6. YALA QUEENS FOOTBALL CLUB

Tourism	Support the team to participate in the Siaya County League - Total indicative budget Kshs. 602,250
---------	--

7. YALA OPEN MARKET TRADERS

Trade	1. Open and murram of the roads surrounding the market 2. Construct tomatoes, cereals, and mitumba traders' shades 3. Connect the water to the market and the toilets 4. Erect floodlights in the market
-------	---

**SIAYA COUNTY BUDGET AND ECONOMIC FORUM ADVISORY ON ANNUAL
PLANNING AND BUDGETING FOR FINANCIAL YEAR 2025-2026**

INTRODUCTION

County Budget and Economic Forum (CBEF) is set-up to coordinate and collect views from the public during the budgeting process and function as a think-tank for the County government in terms of financial and economic management. The CBEF assists the county to analyze and identify its priorities as they budget for programs, improve coordination between the citizens and government and improve harmonization of project implementation and funding.

Siaya CBEF members in August 2024, had consultative sessions with all the 10 sectors in the County Government of Siaya in a meeting convened at Marais Hotel in Siaya. The sessions provided for a space for the departments to share their performance status for the FY 2023-2024 and their proposals for the new budget calendar for 2025-2026. Secondly, the CBEF members participated in the public participation sessions in all the 30 wards lead by the Department of Finance and Economic Planning to consolidate citizens views for incorporation into the Annual Development Plan for the Financial Year 2025-2026.

SIGNIFICANT OBSERVATIONS & RECOMMENDATIONS

1. Agriculture, Livestock & Fisheries

Financing of Agricultural Sector in Siaya is not adequate: The County Government of Siaya continuously refers to the potential of Agricultural Sector to turn around the economic status of the communities in Siaya through increased food security and household income. However, this is not translated into the actual direct investment the County is making in their annual budgets. This limits financing of projects and programs in the agriculture sector with a potential of improving the livelihood of many households. There is still heavy reliance in donor funding projects which are not sustainable if the county cannot finance programs and projects to supplement the donor funded projects.

Limited plans to control fish cage farming in lake: There is increasing number of investors and individuals putting up cages in the lake for fish farming. However, in our interaction with the department little efforts are being made to control fish cages in the lake however, its potential of increasing the revenue basket for the County Government of Siaya.

Extension Services: The department recruited 69 officers to strengthen the extension service to farmers in the county. However, this is still not enough, they still need additional extension officers and support for the officers in terms of equipment’s and trainings to provide effective and timely extension services.

County Subsidies in Agricultural sector: this includes seeds, fertilizers and tractor hire services; the Department of Agriculture should fast track the following legislations; Grants & Subsidy Bill and Mechanization Bill. These will provide frameworks for managing subsidies and mechanization services in the county.

Mis-match of ADP and CFSP: the department highlighted that they lost most of their priorities in the ADP 2024-2025 in the CFSP 2024-2025 and therefore, this means that their priority projects for 2024-2025 were never considered in the final budget for 2024-2025. Considerations should be made to ensure priorities do not fall out in the subsequent budget documents. This is against the law as the budget documents should align from ADP, CFSP to approved budget.

Implementation of Siaya County Youth Agribusiness Strategy 2022-2027; Agriculture presents a huge potential to create employment for the youth in Siaya County. With support and partnership with GIZ under Agri-Jobs for Youth, the department developed an agribusiness strategy with specific strategies to support youth participation in Agriculture and create employment opportunities in Agrifood sector. However, there is limited efforts to implement this strategy as highlighted in the department annual plans. Apart from the donor driven youth programs the department is has limited programs demonstrating implementation of the strategy. We recommend that the department to identify specific component of the strategy and prioritize for implementation in FY 2025-2026. Example is creating a revolving fund to support youth agri-prenuers. The strategy aligns with the CIDP 2023-2027 and the Nyalore Manifesto on creation of employment, improving opportunities for youth and strengthening SME's in agrifood sector.

Promotion of Staffs in the Agriculture Sector: It was highlighted that the last time staffs in this department were promoted was in the year 2015. However, this limits or lowers the energy and commitment of staffs to provide services. The department needs adequate funding in the FY 2025-2026 to support staff promotion and general welfare of staffs in the department which include timely payment of health insurance for the staffs.

Farmers learning Centre; with the collapse of Siaya ATC, the department should prioritize investment to establish a farmers learning center owned and managed by the County Government of Siaya. Vulnerable farmers in Siaya County experience challenges of seeking for extensions in privately owned farmer learning spaces or model farms which require payment to access information and extension. However, if there is a possibility to revive Siaya ATC, adequate budget allocations should be considered in FY 2025-2026 to not only renovate the structures at the ATC budget establish model farms with different technologies in variety of value chains for farmers in Siaya access free extension.

Improving Fisheries Sector in Siaya: The department should consider and be supported to establish fisheries co-management framework and operationalize its implementation. This will improve security of our fisheries sites, increase revenue raised by the sector and strengthen compliance measures by those in the fish value chain along the lake in Siaya.

Priority for Investment in Agriculture Sector should target SME's and Agro-processing Enterprises: The 2023-2027 CIDP for Siaya and the Nyalore Manifesto anchors job creation as a significant pillar. With agriculture being one of its more priority sectors to turn around the economy of the county, planning and budgeting focus should give priority to SME's and initiatives that put Siaya in the outside market for produce raised and processed in Siaya. Therefore, significant value chains such as apiculture, soyabeans, groundnuts, rice, poultry, fish, African Leafy Vegetables, cotton and mangoes should be given priority in budgeting to support and establish SME's that support production and value addition in the mentioned value chains.

2. Education, Youth Affairs, Gender & Social Services

Strengthening VTC's in Siaya: VTC's education is a devolved function. However, very little focus exists to support the growth of the VTC's in Siaya. This includes timely disbursement of adequate capitation to the institutions; modernizing learning equipment's in the VTC's and improving infrastructure in the existing VTC's. The Department of Education still consider building additional VTC's while the existing ones are not yet fully equipped for conducive

learning. The bottom-up transformation agenda is keen on promoting and supporting skills-based learning to open opportunities for self-employment creation by the youth. This is something the county should adopt and strengthen the VTC's in Siaya. Siaya County youth population is over 30% of the total population and majority are not skilled. Improving the VTC's and increasing capitation to the VTC's will create opportunities for youth in the rural areas to enroll and acquire employability skills. As we speak, the VTC's in Siaya have had serious delays in capitation and has affected their operations. In FY 2025-2026, the Department of Education should consider adequate allocation for capitation and timely disbursement to the VTC's. The department focus is inclined to ECDE with limited focus on VTC's.

Bursary allocation: The number of vulnerable students in Siaya has increased and therefore, there is need to increase the bursary allocation to Kshs. 250,000,000 so that at least each ward to have Kshs. 8,000,000 for bursary. We should limit bursary allocation to the department and avoid bursary in the ward budgets for MCA's. Bursary is a fund and is guided by an Act which requires that allocation is done in one pull.

Model ECDE in Bondo Municipality: CBEF found it a noble project however, not right at this moment. That should be a future project. The department should give priority to mainstreaming their plans for the model ECDE into the existing ECDE's in Siaya so that there's equality in access to pre-primary education for all children in the county. The spirit of devolution is to ensure the vulnerable have access to better services and not to promote disparities in access to services.

Youth, Women & PWD's: The department is doing dismal efforts in prioritizing programs and projects that address these groups issues in Siaya. Youth, Women and PWD's have both economic and social issues that needs prioritization in the annual plans and budgets. Therefore, the department should engage effectively with the group's representatives and leaders from the ward to sub-county level to prioritize tangible initiatives for budgeting in FY 2025-2026. Finally, Youth, Women and PWD's empowerment should not be left for one department. The Department of Education, Youth Affairs, Gender & Social Services should engage with other departments to ensure Youth, Women & PWD's programs are mainstreamed in all departments through specific projects in FY 2025-2026 planning and budgeting process.

3. Lands & Physical Planning

Financing Siaya, Bondo & Ugunja Municipalities: These are potential revenue streams for CGS. However, little allocation is made to support the operations and development of the municipalities. We recommend the following; at least 30% increase in the allocations for the 3 municipalities to effectively support their operations and development projects, secondly all the projects in the Lands Department and other departments like Trade planned in FY 2025-2026 within the three municipalities should be pulled off the Departments and the resources added to the municipalities to implement those projects. As at now the three municipalities are registering more challenges in their operations and developments than achievements.

Spatial Plan for Siaya Municipality: Consideration should be made in FY 2025-2026 to ensure the consultant is fully paid so that they hand over the spatial plan to the municipality. It was observed that up to date, the consultant has withheld the spatial plan due to balances remaining in the contract, The spatial plan is a significant document for the development and planning of Siaya Municipality.

Resource mobilization plans for the municipalities: It was demonstrated during presentations that the three municipalities (Siaya, Ugunja and Bondo) have not developed resource mobilization plans that will highlight a framework to raise and tap into opportunities in and outside the municipalities for development alongside the county allocations. Therefore, in FY 2025-2026 priority should be given to developing the resource mobilization plans for the three municipalities.

Lake Kanyaboli Eco-city: The selling point was not clear during presentation by lands department. The CGS should clearly identify the potential selling point for the Eco-city before prioritization of resources to come up with the infrastructure. However, we risk not realizing value for money in the project. What is the driving factor for the eco-city, who is our target and what are the potential revenue streams from the eco-city and how do CGS wants to tap the revenue?

4. Tourism, Culture, Sports & Arts

Sports & Tournaments in Siaya: from the observations, there are different sports/tournaments planned in the ADP 2025-2026. From wards sport events, Governors cup among others. We recommend the resources can be pulled together to support a county sports league that starts from the wards and the final crowned by the governor rather than having different allocations for different levels of sports. The county league should not only include football but also other games. Therefore, adequate allocation to be considered to support this in FY 2025-2026.

Got Ramogi Development as Culture & Heritage site in Siaya: several allocations have been made for Got Ramogi development in the last 8 financial years. As CBEF we recognize that Got Ramogi is a significant area for the county to promote tourism, research and learning. However, for planned and sustainable development of the site, the department of tourism should give priority to coming up with an investment plan for the site- what really is needed and how can it be executed. As it is now, the public have a feeling that there is no value for money in investments towards Got Ramogi since it features in every budget for Siaya county.

Management of Stadium and Sports Grounds in Siaya: The Department of Tourism and Sports should prioritize development of a legislation that will provide clear framework on how to manage the stadium and sports grounds being developed in the county to avoid vandalism and also tap revenue from agencies and groups that are using the spaces. This should be a priority in FY 2025-2026 before its late.

5. Water, Irrigation, Environment, Climate Change and Natural Resources

Drilling boreholes in Rarieda sub-county: it was noted that borehole projects are no longer viable in Rarieda sub-county due to the saline nature of underground water. Majority of the drilled boreholes are not serving the community households including their animals. Therefore, investments towards water development in Rarieda sub-county should go to West Uyoma water project; Naya Water Project and Asembo water project which has potential of solving the water issue in the sub-county if well invested in and proper extension done to all the locations and sub-locations.

Financing Climate Action Programs in Siaya County: CBEF members noted the existence of FLLoCA as a financing instrument for climate actions in Siaya county. However, there should be deliberate efforts to ensure the county own adequate investment towards climate action interventions in the county in FY 2025-2026. This means institutionalizing climate fund in the department that directly goes to supporting community proposals for climate action. FLLoCA

works on the principle of co-funding. It was noted that the more the county gives in the envelop of climate action the more we received. We therefore, recommend that in FY 2025-2026 the CGS to allocate at least 150M towards climate action so that its allocation through FLLoCA to increase from the current 168M that was received under investment funds.

Priority programs for climate action: observation from the priority plans for FY 2025-2026 in the Department of Water, Irrigation, Environment, Climate Change and Natural Resources demonstrated a lot of focus on establishment of tree nurseries and planting of trees. However, these are just but mitigation measures. The recommendation is to have the department focus on more projects that strengthens adaption and build community resilience on the impacts of climate change.

Affirmative action in the FLLoCA implementation in Siaya County: deliberate efforts is needed to ensure women, youth and PWD's groups directly benefit from the programs and projects being supported through FLLoCA funds in FY 2025-2026.

Implementation of water projects in Siaya County: Several boreholes have been drilled in the county and the department in their plans for 2025-2026 have prioritized additional boreholes in some parts of the county. The sustainability of these boreholes is not clear since majority of boreholes already drilled are either broken, stalled or water doesn't exist. The department need to rethink to either give priority to rehabilitating the existing broken and stalled boreholes in FY 2025-2026 and consider extension of already existing and functioning boreholes rather than drilling new boreholes. Secondly, in event that a new borehole is to be drilled then effective hydrological survey should be considered for every borehole.

6. Governance Department

Civic Education programmes; limited attention has been provided by the CGS on matters civic education to the people. Even in the FY 2025-2026 plans, there is no priority for civic education why is a mandate of the government. This limits effective public engagement with the County Government of Siaya including access to information. The CGS through the Department of Governance should prioritize allocation for civic education at the ward level including developing County Civic Education Curriculum or toolkit and identifying ward level civic educators to support a county based civic education program.

7. Trade & Enterprise

Design of Markets: We recognize the existing efforts the CGS has made to develop markets and market centres in Siaya. However, significant observation is in the design in terms of the size of the markets being developed and the stalls inside the markets for use by the traders. The markets shades being developed are small and the stalls inside does not fit the items the traders have. Examples is Boro Market and Ramba Market. Therefore, we recommend that subsequent plans for developing market shades or market centres should prioritize adequate allocation that will facilitate coming up with a structure of good size with spacious stalls including storage facilities, proper drainage and sanitation facilities and PWD's friendly spaces.

Water in the market centres: The CGS should give priority in FY 2025-2026 for all developed markets and market center to have proper water system. Majority of markets in Siaya doesn't have water system and this weakens the hygiene in the markets and puts the life of the consumers and general community at a risk.

Cooperative Development Fund: Considerations should be made to increase the allocation to at least **Kshs. 150M** and make it accessible for traders in Siaya. The best approach is for the department to mobilize and conduct trainings for existing traders sacco and develop a framework for applying for the fund. The alternative of working with one county Sacco in disbursing the cooperative fund is not effective. Directorate of cooperatives to strengthen the exiting cooperatives by allocating money in FY 2025-2026 to train the Saccos and support them come up with structures needed in accessing the cooperative fund then allow them apply for the fund as individual Saccos not through a proxy Sacco. Considerations of in-kind support to youth, PWD's and women traders should be made through the fund so that no one is left behind as a beneficiary of the cooperative fund.

Revenue collectors' identity tags/unique numbers/uniforms: the department should consider in FY 2025-2026 allocation to facilitate coming up with adequate unique uniforms and identify numbers for revenue collectors in Siaya. Traders have compiled on confusion that exists in the revenue collection and therefore, it's a challenge in certain occasions to understand who exactly is employed by the CGS to collect revenue in specific markets.

8. Health & Sanitation

Recruitment of Specialists in Madiany, Ukwala, SCRH, Yala, Sigomre, Got-Agulu, Ruambwa and Bondo Hospitals: There is public outcry that the above-mentioned health facilities have inadequate specialist/medical officers and this limits service delivery for critical health conditions. These include surgeons, pediatricians, Dentists, Gynecologists among others. Therefore, there is need to prioritize budget allocation to facilitate recruitment of these specialist in SCRH and at least two sub-county hospitals like Yala and Madiany.

Allocation for adequate supply of drugs in Health facilities: The department has made efforts to ensure drugs are available in the health facilities in Siaya. However, there is still a public outcry on drugs shortage in most of the health facilities including SCRH. Therefore, priority should be given in FY 2025-2026 to ensure adequate allocation for drugs that can sustain the growing number of patients seeking health care service in the facilities in Siaya.

GBV rescue center at Siaya County Referral Hospital: According to KDHS 2022 data, Siaya County recorded 24% cases of gender-based violence. This statistic is higher than the national statistics. However, with the data recorded in 2022, the numbers still continue to rise with cases being reported almost on a daily basis. Siaya has not invested in a GBV rescue center however, the existing need to support the survivors both girls, women, boys and men. It is time the county through the health department to give priority to at least Kshs. 20M in FY 2025-2026 to support coming up with phase one of the GBV rescue center at the SCRH which will provide integrated services to GBV survivors in Siaya.

9. Roads & Public works

Surveying of Roads in Siaya: In FY 2025-2026, the Department of roads should consider allocation to support survey of all roads to be developed by the CGS. This will help in understanding the actual size of roads being developed in the county and ensure all roads in the county are of standard size. Currently, its not clear what's the standard size of roads being developed by the CGS since there are road smaller in size but a lot of resources have been invested in the roads.

Mainstreaming Youth Employment in implementation of road projects in Siaya: We recommend that in FY 2025-2026, the department should give priority to creation of employment opportunities for youth through labor-based initiative that can give chance to unemployed youth in the villages to be involved in developing the roads. Contractors should be compelled during award of contract that a specified amount of money (at least 30% of contract sum) should benefit the youth through labor-based work and this should be included in the contract signed. This is an alternative way and best practice the department can create employment to the unemployed youth in the county.

Budgeting and implementation of road projects in Siaya: efforts have been made by the CGS to ensure accessibility through opening and developing roads across different parts of the county. However, gaps still exist in workmanship and allocation of resources that does not facilitate all works in the road for effective completion and observations are that one road can be allocated money almost every FY but still proper work is never done. We recommend that in FY 2025-2026, the CGS should give priority to few roads that connects several places/villages/sub-locations including schools and health facilities and allocate adequate resources that will facilitate completion of all components of the roads with a potential of serving for at least 4 years before thinking of maintaining it again soon. This will allow the CGS to save on huge resources going to roads every FY and redirecting to other critical sectors such as Agriculture, Health and Education. In FY 2025-2026 implementation, supervision and quality checks should also be reinforce by the department including the county monitoring units and Governor Delivery Unit (GDU) to ensure quality workmanship in all the road projects in the county.

CROSS-CUTTING ISSUES

Budget cuts for departments without proper consultation: this emerged in all the departments and worst affected are the municipalities e.g. Siaya Municipality where they even experienced fall-out of already tendered projects during supplementary budgeting in FY 2023-2024. The affects the operations of the departments, brings conflicts with contractors, opens window for more incomplete and stalled projects and limits service delivery. Future considerations should be made to ringfence budgets already approved for projects in the departments and if there is need to drop at the supplementary, then consultation should be made with the departments.

Skewed projects distribution at the sub-county and ward level: for example, 2024-2025 approved budget projects especially at the ward are leaning in one direction and therefore, other parts of the wards do not benefit effectively in the projects being implemented. Example is North Alego ward, Yimbo-East ward, West Alego ward among others. Another example is the distribution of flagship projects in the overall budget – Example Bondo Sub-County is favored. Therefore, we recommend that CGS through the Governance Department to operationalize Siaya County Equitable Development Act, 2019 that will create structures like ward development committees or participatory budget committees to oversee and guide in distribution of projects at the ward level.

Project Management Committees in Siaya: It was noted that there is a huge cry from the public on how projects are being managed during implementation, how contractors handle projects and the payments of the PMC's. We therefore recommend that Executive and Assembly to bring back

the PMC Bill for discussion, approval and operationalization to salvage the serious PMC issues in Siaya including how they are constituted. This should be a priority in FY 2025-2026.

Allocation for Projects: It was noted that in most cases, projects are allocated inadequate funds that cannot complete the projects. Therefore, we recommend that moving forward, the various department should prioritize limited viable projects and allocate adequate resources that goes to completion.

Ward implementation status reports: one of the functions/roles of ward admins is to organize public participation in their wards and share with the people the progress of all the projects and programs being implemented in the ward including their status. However, this was noted that it never happens until there is official public participation forums in the ward during budgeting. This brings a lot of discussions and arguments and limits time to discuss new proposals during public participation sessions. We therefore, that the ward admins should develop status reports and share with stakeholders in the ward through forums or public notices for prior interactions and clarity before official public participation days. Governance and Administration department should develop a standard template for monthly reports by the ward admins and hold them accountable for not sharing the reports with the public in the specific wards.

Affirmative Action for youth, PWD's and Women: it was noted that CGS is not effectively implementing the affirmative action strategy to empower youth, women and PWD's in the county by awarding 30% tenders to these groups. This is an area which needs consideration and an audit should be done to ensure all the departments comply to this requirement. The audit should establish the actual owners of the companies and enterprises being awarded the 30% tenders to ascertain that they are the necessary category that should benefit and not someone benefiting on behalf of the groups.

Clustering of tenders and awarded to one contractor: It emerged during ward level public participation across the county that CGS clusters tenders and awards to one contractor. For instance, Nile Logistics among others. The public highlighted that this limits quality of workmanship and opportunity for other companies to compete for the same opportunities in the county.

Projects reported as complete in reports but actual status is incomplete: during public participation forums, it was highlighted by the public that some projects are always reported to be complete and paid and in real situation the projects are never complete. Therefore, there is need for the monitoring units in the CGS to conduct actual site visits to ascertain the reports shared in the offices on the status of the projects.

Increasing Revenue Envelope: We recommend that each department should be recognized with the amount of revenue they contribute to the overall resource envelope for CGS. The chief officers in each department should held accountable for low revenue streams in their existing revenue sites. This will not only increase revenue but also limit revenue pilferage. Negotiations for sector ceilings should also be pegged on the amount of revenue the department contributes. Secondly, committee or oversight structure should be created to supervise revenue collection in each sub-county and the respective officers involved in revenue collection report to the committee or revenue oversight body in the county. This should be guided by a legislation that would inform these frameworks of strengthening revenue envelope in the county.

Operations of CGS and National Government structures in Siaya: It was noted during public participation that the CGS and existing national government structures in Siaya county have not synchronized effectively. There is limited coordination between the two structures especially at the ward level. Therefore, both levels of government at the ward level are working in isolation in terms of activities in the respective wards and in most cases the chiefs and assistant chiefs do not appear in county activities or are never invited in certain cases. Therefore, there is need for effective coordination and working relationship in terms of sharing information and organizing public activities in the ward by the ward admins, chiefs and assistant chiefs.

Citizen’s priorities do not find space in the final budget: 95% of the public in at least 25 wards in county raised concerns that their priorities have always been pull-out in the budget and therefore the final budget do not reflect their proposals. In some areas the public further highlighted that they have lost hope in public participation and find it not necessary. It is therefore, necessary for the Governance Department to ensure the spirit of public participation is observed in Siaya County and the people are provided adequate feedback on their proposals or views especially on matters budgets and execution of projects. In certain wards like East Ugenya, the public noted that next public participation it will never be the same for the county officers.

Employment of Adequate sign language interpreters: CBEF members have received outcry from PWD’s groups on how their Deaf fellows undergo frustrations while accessing services from the CGS offices especially in health facilities. We therefore, recommend that in FY 2025-2026, the county in its plans to employ at least one sign language interpreter in the following health facilities, Madiany, SCRH, Ukwala, Ambira, Yala, Sigmore and Bondo. Considerations should also be made for employment of sign language interpreter in the department of Education, Governance Department and Trade Department.

CGS staff capacity on public relations: it has emerged that majority of staffs handling the public have issues on managing and listening to public request. We therefore, recommend each department in FY 2025-2026 to plan for refresher sessions for their respective staffs on public relations to address the emerging complains on how CGS handle the citizens visiting the offices.

CONCLUSION

We therefore hope that the above recommendations and observations shall be taken into consideration for in planning and budgeting for FY 2025-2026 including execution of programs and projects in the County.
